The right people for your situation.

Growing? Catching up? Shifting gears? For many companies, staffing is often the greatest challenge. From too-high turnover to too-fast growth, Express can work with you to find the solutions you need. Part-time people. Full-time workers to fill gaps. Short- and long-term contract employees. Professionals and senior executives to build your team. Simply share your needs, and we'll find the best employees for you to keep your company moving ahead.

When you need flexible production schedules...

We'd recommend temporary or contract staffing, short-term or long-term. To keep things simple, we screen and test all candidates, and they work on our payroll. This solution is ideal for completing special projects, managing seasonal peaks in the workflow, and covering for regular employees. Your business benefits from:

- Workers available on short notice
- Fewer core employees
- Less overtime for regular employees
- No downtime
- Lower overhead
- No added workers' comp, unemployment, or benefits costs

When you'd like to evaluate performance before hiring...

One flexible option for long-term hiring is evaluation hire, having an employee work at your company on our payroll. This gives you time to observe a candidate at work before making a commitment. Many clients prefer this on-the-job approach to evaluating before hiring. Your benefits include:

- Discover how well the candidate fits your team
- Learn if the associate likes the job
- Save on training and payroll for people who don't work out
- Easily replace a candidate without hiring and firing
- Decrease turnover
